

Theme Ideas for your White Box Photosession

Inside the box, the all-white environment invites you to dress in bright colours (*colours we might ask you to avoid in a regular session*) and do crazy poses (*we might even push your collage a little further and rotate your pose sideways or upside-down*). We use a collage format to combine a series of these images to create a “story” about your family.

The environment of the box lets us capture the experience for you that shows each person’s own loves and hobbies. It lets us weave together a story of your family’s NOW.

The NOW of loving tractors, football and superheroes, princesses and ballet dance, reading, riding their new red scooter. It shows the size of a little one in your lap, the way he likes to squish his toes, pull Dad’s beard and cuddle Mom.

Each session is unique! Every person in your family – parents, children, pets – all get their own box doing their own thing, their part in the “digital quilting” of your family collage that will hang in your home.

So why not start planning your session now. You can be as crazy and imaginative as you like. Here are some ideas for your theme:

- *Choose one or two colours that will match the decor in the room where you want to hang your collage.*
- *Every family member wear a different primary colour top.*
- *Everyone wear white tops and blue or black jeans.*
- *Each family member bring along their favourite things (e.g. book & coffee mug, laptop, football, teddy bear, etc)*
- *Wear your team’s jerseys for sporting fans and bring along footballs, hurls, etc.*
- *Everyone wear items from one colour, with all other clothing in neutral tones.*
- *Bring along the children’s favourite toys. The box is 4 ft wide so can accommodate scooters, small ride-on toys, etc.*
- *For the little girl who loves pink, parents could wear pale pastel tones and bring along pink toys.*
